

## COOPERATIVE ECONOMIC INSECT SURVEY REPORT

Glenn A. Salsbury, Survey Entomologist

Report 4, Volume 54

16 March 2006

A MITE: The mite, *Petrobia harti* was found infesting the ornamental plant Shamrock in a greenhouse.

JAPANESE BEETLE: Japanese beetles were found infesting rootballs of dogwood that had been shipped from Tennessee. Also found in the rootballs were large weevil larvae and green June beetle grubs. Nineteen trees were destroyed.
